Linkium CL131

Water-based aluminium spray cleaner

Water-based industrial cleaner

Version 1.0 | 12 November 2026

A water-based spray cleaner for aluminium and aluminium-alloy workpieces.

Published process conditions

Property	Reference value	Conditions
Cleaning method	Spray	Published process option.
Bath temperature	55-60 °C	Published operating-temperature recommendation.
Contact time	1-3 min	Published process recommendation.
Workpiece selection	Aluminium and aluminium alloys	Check compatibility with the actual alloy, finish and assembly.

Published process conditions. Establish dilution, workpiece compatibility and rinsing for the selected application.

Applications

- Spray cleaning of aluminium and aluminium alloys.

Grade selection

Select the cleaning method for the workpiece and soil. Establish dilution, bath loading and rinsing for the selected process; the published temperature and contact-time windows are starting references.

Packaging and handling

The selected pack, quantity and delivery terms are confirmed with the order.

Consult the current product-specific SDS for handling, storage and transport. Shelf life and regulatory suitability are confirmed for the selected grade and destination.
