Linkium SM310

Vinyl-terminated silicone fluid

CAS 68083-19-2 | Silicone material

Version 1.0 | 11 November 2026

A vinyl-terminated silicone fluid family for silicone rubber, silicone gels and other reactive formulations.

Technical data

Property	Reference value	Conditions
Kinematic viscosity - series range	5-100000 mm²/s	Series range; measurement temperature not listed.

Reference values support material selection. Test methods and acceptance tolerances are defined in the agreed specification.

Applications

- Reactive intermediate for silicone rubber and silicone gels.
- Silicone-modified acrylic resins and emulsions.
- Lubricant and softener applications.

Grade selection

The viscosity range describes a family. Specify the target kinematic viscosity, its measurement temperature, vinyl content and formulation requirements to select a supply grade.

Packaging and handling

Net-pack options: 25 kg, 200 kg. The selected pack, quantity and delivery terms are confirmed with the order.

Consult the current product-specific SDS for handling, storage and transport. Shelf life and regulatory suitability are confirmed for the selected grade and destination.
