Linkium SM420

Dichloromethylvinylsilane

CAS 124-70-9 | Silicone material

Version 1.0 | 12 November 2026

A vinyl-functional chlorosilane intermediate for vinyl cyclic siloxane manufacture and selected adhesive formulations.

Technical data

Property	Reference value	Conditions
Purity - published alternatives	≥99.5%/99.0%	Separate grade options; see grade selection.
Molecular weight	141.05	Identity reference.
Refractive index	1.4268~1.4272	Temperature and wavelength not stated.

Reference values support material selection. Test methods and acceptance tolerances are defined in the agreed specification.

Applications

- Intermediate for vinyl cyclic siloxane manufacture.
- Additive for electronic adhesive formulations.

Grade selection

Two purity alternatives are published independently. Specify the required purity and impurity profile for the selected grade; no matched grade schedule is inferred.

Packaging and handling

Net-pack options: 25 kg, 200 kg. The selected pack, quantity and delivery terms are confirmed with the order.

Consult the current product-specific SDS for handling, storage and transport. Shelf life and regulatory suitability are confirmed for the selected grade and destination.
